Framing Clamp System has 1,000 lb capacity per end clamp.

Framing Clamp System requires no welding or specialized tools and consists of end clamps, T-brackets, and

perforated channels, which are available in lengths up to 10 ft. In typical framing application, 4 end clamps are attached to 2 parallel bar joists or beams, and each end clamp occupies 1-1/4 x 3 in. space between joists. System is designed for installing HVAC equipment, exhaust fans, vents, and skylights; framing roof openings; and supporting loads above or below roof decks. **Chicago Clamp Co.**; 866-633-6798 708-343-8311; Tech Contact: Kevin Barry
