Simpson Strong-Tie®

Phone: 800-925-5099

Email: web@strongtie.com

Web: www.strongtie.com

Product: SHH Steel Header Hangers

Description: Developed to support CFS framing box headers as well as large-flange lay-in headers used in curtain-wall construction, the SHH hangers ease installation by reducing drywall buildup. The hanger's screw count has also been minimized with extensive component assembly testing.

Product: Simpson Strong-Tie® SBR and DBR Spacer Bracers

Description: Load rated and assembly tested, SBR and DBR spacer bracers reduce the installed cost of cold-formed steel stud walls. The SBR and DBR come with pre-punched slots that eliminate the need for bridging clips and enable a faster layout.

Super Stud Building Products, Inc.

Phone: 800-477-7883

Email: jfoote@buysuperstud.com

Web: www.buysuperstud.com

Product: EDGE™ EQ Steel Framing System

Description: Features lightweight, high-strength steel, an innovative design incorporating a closed triangular lip, and provides the safest installation environment in the industry. Provides the highest rating, making it an ideal choice for architects looking to reduce sound transmission. Combine these features with industry leading STC ratings.

Trimble

Phone: 770-426-5105

Email: kristine.plemmons@trimble.com

Web: www.tekla.com

Product: Tekla Structures

Description: Models created with Tekla software carry the accurate, reliable, and detailed information needed for successful Building Information Modeling and construction execution. Tekla works with all materials and the most complex structures – you set the limits. Tekla software allows effective information flow: Architects, engineers and contractors can share and coordinate project information.

Vulcraft Verco Group

Phone: 260-337-1800

Email: dave.bjork@nucor.com

Web: www.vulcraft.com

Product: Steel Joists and Deck

Description: Vulcraft Verco Group is the SAFEST, highest quality, lowest cost, most productive and most profitable steel and steel products company in the world. With our local sales teams, assured steel supply, just-in-time fleet, and vetted carrier service, we have the people in place to deliver.

Providing Flexible Solutions for 10 Years

Joist Grip Framing Clamp System

Support your rooftop loads in uplift and download conditions. The distributed load capacity of 4,000 lbs per complete system makes the Joist Grip Framing Clamp System the ideal support for rooftop unit installations.

Pipe Header System

Hanger Clamps, rated for 1,000 lbs each allow hanging of equipment below the roof deck while utilizing the ability of the Framing Clamps to distribute the load to panel points on the top chord of the bar joist.

Suspension Clamp System

Utilize the Panel Point Bridge to safely suspend HVAC equipment, conveyors or other ceiling fixtures without welding or drilling using the Suspension Clamp System.

Upper Deck Fall Protection System

Using corrugations in the standard roof deck, the Upper Deck Fall Protection Anchorage System easily clamps to the top chord of the bar joist or wide flange support.

Meticulously Engineered. Rigorously Tested.
